

SYMPHONY WELLNESS

Synesthetic technology

Symphony Wellness is the new management and control system, dedicated to Wellness Centers and SPAs, that focuses on the world of sensations.

The Symphony technology is designed to simplify the facility management of Wellness Centers and SPAs, and focuses on energy saving, privacy and relax of the customers. Symphony is targeted to the simple and coordinated use of the equipment. The overall goal is to supply services in an integrated and unprecedented way, ensuring comfort and absolute intimacy.

Symphony allows to configure and personalize scenes and the whole facility in just a few clicks or taps: Lights, Music, Video, Olfactory sensations, are all integrated in synchronized settings.

From the pools to the common areas, from the sauna to the entertainment cabin, everything is set up according to the customer's preferences.

SYNESTHETIC TECHNOLOGY
INNOVATION AT THE SERVICE OF MAN

SYMPHONY WELLNESS SERVICES

SYMPHONY WELLNESS HIGHLIGHTS

Efficiency

Symphony is the ideal technology to improve the service offered which allows to achieve an efficient management of resources.

Personalized Settings

Symphony can be integrated with management software and CRM for the recovery of historical information on customers and setting custom scenes.

Synchronization of Effects

Symphony allows the synchronization of lighting effects, aromatic effects and automatism with music and video playlists.

Advantages

- Differentiated supervision of the entire structure, for common areas and entertainment cabins.
- Full flexibility on the disposal of the spaces and services offered.
- Reduction of the electricity consumption and efficiency on the management costs.
