HEADING THE FUTURE

HEADING THE FUTURE

PISA HEADQUARTERS

Company profile

Since 2006, we have designed and developed an IoT platform under our own brands **Symphony and Sealux**.

The platform manages the infrastructure that allows **the whole control and automation of smart facilities in complex technology environments, such as mega yachts, luxury villas and smart buildings**. It supports a broad range of sensors, actuators and fieldbuses, implementing a rule-based control logic that interacts with a **full custom Graphical User Interface**.

Established

2002

Core team with with more than 20 years of experience in ICT, telecommunications, control & automation

R&D Expenditure

~20%

(out of 8 M€ turnover) The time gap between technological innovation and obsolescence is narrowing, so it's mandatory to invest in research and innovation

Base

Pisa

Ideal location for development of advanced technologies, maintaining excellent links with local academia.

Headquarters
Pisa

Branch office
Rome

Company overview

Nextworks at a glance

We can design and implement a wide range of technology solutions totally tailor-made, integrating also the most cutting-edge components and solutions offered today in markets of home automation and audio-video.

All of this has been possible because R&D is in our roots. The know-how generated from our research and innovation activities has always enabled the constant upgrading of our products and the offer of consultancy services in IoT, system integration and networks.

MILESTONES

2026

80+ R&D project grants won, & 40+ recognized innovations in EU Innovation Radar

2022

400+ Symphony & Sealux systems delivered

2021

Nextworks is elected in the Governing Board of the 6G Industry Association of the EU Commission

2016

First Smart Building Management system installation

2014

Nextworks starts a new line of R&D in 5G

2009

Symphony & Sealux first release and first installation

2007

First integrated system on an IP network (BEST - Benetti Exclusive Sea Technology)

2006

Start of our first EU R&D project

2004

Start of our R&D on quad play systems

2002

Nextworks is founded

Focus on R&D

Thanks to the R&D department, Nextworks leverages a constantly evolving **ICT know-how** which is unique in the SME landscape, with high potential for easy turnaround into offerings of new innovative services and products.

Nextworks has a leading role in 5G/6G R&D in Europe with main contributions in design and standardisation of control, management and orchestration **solutions for 5G/6G networks, Telco Edge Cloud platforms**, and Factories of the Future.

Highly specialised consultancy services and research and development activities.

R&D HIGHLIGHTS

Large number of software prototypes for network control and management, edge/cloud and IoT platforms, deployed in 20+ EU labs and testbeds

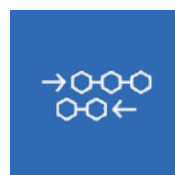

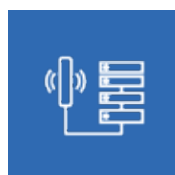

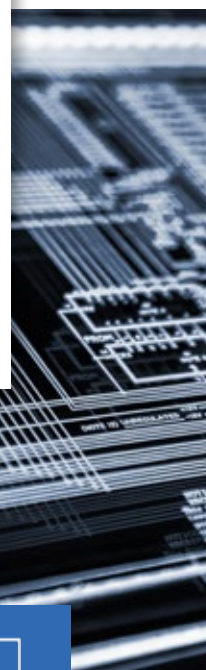

80+
Projects funded since 2006

40+ recognized innovations in EU innovation radar

15+ participation in EU large-scale trials and pilots with multi-sector verticals

60+ demonstrations in top-ranked conferences and industrial events

Our products

Efficiency, simplicity
and flexibility

 **SEALUX**

 **symphony**

Sealux and Symphony were created to respond to a need for efficiency, simplicity and flexibility. A **universal and open platform** that, with the use of the most advanced technology standards, allows the **smooth integration of third-party products**.

COMFORT LIVING

Enjoy your environments, control your lighting, curtains and air conditioning easily and quickly

ENTERTAINMENT

The latest movies & TV shows, your favourite music artists, all at your fingertips on your controller

NETWORKING

Master bandwidth management to let the you enjoy internet at full speed

VIDEOSURVEILLANCE

Feel safe and protected with an all-around CCTV system

COMMUNICATION

Stay in touch with anyone, in a smart way

MONITORING

Keep all technical information under control, available on site and on line

Market Sectors

YACHTING

With more than 160 Mega Yachts delivered, Nextworks is one of the top technology providers in Italy

ASSISTED LIVING

Providing independent living, Nextworks system eases daily operations for those with disabilities.

IMMERSIVE ENVIRONMENTS

Creative use of cutting-edge audiovisual technology to make a range of experiences and bring many viewers into the same simulation

VILLAS

Nextworks combines advanced technological concepts to create a living environment with its own distinct personality and appeal.

HOTELS

We design and develop sensitive technology for all hospitality cases, where the guest experience is the centre around which the hotel revolves.

BUILDINGS

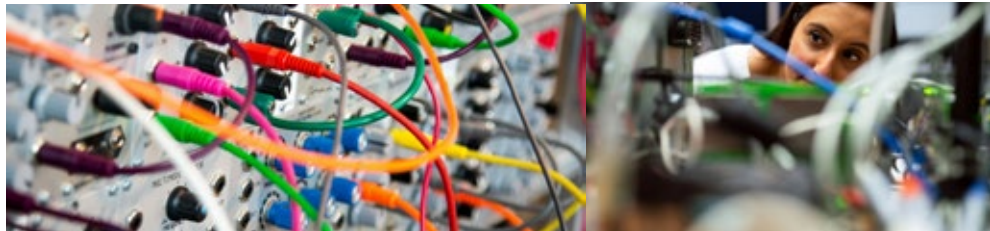

A new approach to Technical Building Management: no more legacy automation systems or traditional supervisors.

Our Employer Value Pillars

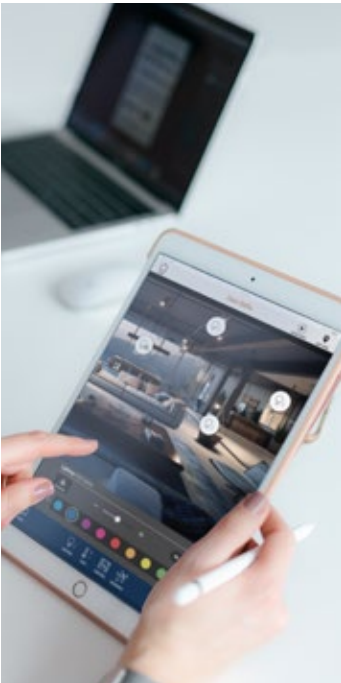

Innovation Is In Our DNA:

We strongly focus on **Technological Excellence** and we pursue it with a profound experience in **Research and Innovation**.

If they can **imagine it**, we can do it:

We meet every challenge from our customers, turning into technology what for others is just imagination.

In **Skills** we trust:

We work in a context with **great opportunities for learning** and **professional growth**, because meritocracy matters to us.

**Come work
with Us**

If you're a tech enthusiast who likes casual settings, Nextworks might be the right place for you

What you will find in Nextworks:

A series of highly inclusive decision-making processes, based on **cooperation and team working**.

Constant **attention to the needs of employees**, including **pay, welfare and health**.

An **attractive compensation package** which includes a **competitive salary**, **meal vouchers**, **meritocratic bonuses** and a **supplementary retirement fund** footed by the company.

Possibility to enjoy **Remote Working**, as well as available colleagues in the office for a **coffee or a BBQ together**.
